

## Professor Chuan Zhao

**Professor Chuan Zhao** is the Head of Nanoelectrochemistry Lab in the University of New South Wales (UNSW), and a Professorial Future Fellow of Australian Research Council. He leads the Hydrogen Production Theme in ARC Training Centre for the *Global Hydrogen Economy*, and chairs the Electrochemistry Division Royal Australian Chemical Institute. Prof Zhao is one of the pioneers in developing non-precious-metal and low-precious-metal-based electrocatalysts for green hydrogen production and have led significant commercialisation projects on water electrolyzers and fuel cells. He has published more than 300 high impact research papers and held >12 patents of which 8 have been commercialised. Prof Zhao is elected Fellow of Royal Society of Chemistry, Fellow of RACI, Fellow of Royal Society of New South Wales.
