

Professor Nigel Brandon

Professor Nigel Brandon OBE FREng FRS holds the Chair in Sustainable Development in Energy at Imperial College London. His research interests are focused on electrochemical technologies for the low carbon transition, with a particular focus on fuel cells, hydrogen and flow batteries. He is a founder of Ceres Power, a fuel cell and electrolyser company, and RFC Power, a flow battery company. He is a Fellow of the Royal Academy of Engineering, a Fellow of the Royal Society and an International Member of the US National Academy of Engineering.
